HEARING RESEARCH

Vol. 113, Nos. 1–2
November 1997

CONTENTS

Cited in: Biological Abstracts (BIOSIS); Chemical Abstracts; Current Contents/Life Sciences; Current Awareness in Biological Sciences (CABS); Excerpta Medica (EMBASE); Index Medicus; INSPEC; PASCAL M; Reference Update

Research Papers

P. Poirier, H. Jiang, F. Lepore and J.-P. Guillemot (Canada)
Positional, directional and speed selectivities in the primary auditory cortex of the cat 1

E.V. Leonova and Y. Raphael (USA)
Organization of cell junctions and cytoskeleton in the reticular lamina in normal and ototoxically damaged organ of Corti 14

A.N. Temchin, N.C. Rich and M.A. Ruggero (USA)
Low-frequency suppression of auditory nerve responses to characteristic frequency tones 29

G. Frank and M. Kössl (Germany)
Acoustical and electrical biasing of the cochlea partition. Effects on the acoustic two tone distortions f_2-f_1 and $2f_1-f_2$ 57

L. Aitkin, S. Cochran, S. Frost, A. Martsi-McClintock and B. Masterton (Australia, USA)
Features of the auditory development of the short-tailed Brazilian opossum, *Monodelphis domestica*: evoked responses, neonatal vocalizations and synapses in the inferior colliculus 69

X.-Y. Zheng, D.-L. Ding, S.L. McFadden and D. Henderson (USA)
Evidence that inner hair cells are the major source of cochlear summating potentials 76

S. Maison, C. Micheyl, A. Chays and L. Collet (France)
Medial olivocochlear system stabilizes active cochlear micromechanical properties in humans 89

S. Takeuchi, M. Ando and A. Irimajiri (Japan)
Changes in the volume of marginal cells induced by isotonic 'Cl^- depletion/restoration': involvement of the Cl^- channel and Na^+-K^+-Cl^- cotransporter 99

M. Kenmochi and J.J. Eggermont (Canada)
Salicylate and quinine affect the central nervous system 110

P.A. Leake, A.L. Kuntz, C.M. Moore and P.L. Chambers (USA)
Cochlear pathology induced by aminoglycoside ototoxicity during postnatal maturation in cats 117

A.N. Lukashkin and I.J. Russell (UK)
The voltage dependence of the mechanoelectrical transducer modifies low frequency outer hair cell electromotility in vitro 133

C. van den Honert, C.C. Finley and S. Xue (USA)
Microstimulation of auditory nerve for estimating cochlear place of single fibers in a deaf ear 140

R.P. Bobbin, S.H.B. Chu, R.A. Skellett, J. Campbell and M. Fallon (USA)
Cytotoxicity and mitogenicity of adenosine triphosphate in the cochlea 155

J.L. McPartland, J.F. Culling and D.R. Moore (UK)
Changes in lateralization and loudness judgements during one week of unilateral ear plugging 165

X. Huang, K.J. Gerhardt, R.M. Abrams and P.J. Antonelli (USA)
Temporary threshold shifts induced by low-pass and high-pass filtered noises in fetal sheep in utero 173

T. Fukazawa (Japan)
A model of cochlear micromechanics 182

Contents continued on inside back cover

0378-5955(199711)113:1/2;1-M

(Contents continued from back cover)

S.S. Gill and A.N. Salt (USA)
Quantitative differences in endolymphatic calcium and endocochlear potential between pigmented and albino guinea pigs 191

B.H. Hu, X.Y. Zheng, S.L. McFadden, R.D. Kopke and D. Henderson (USA)
R-phenylisopropyladenosine attenuates noise-induced hearing loss in the chinchilla 198

M.S. Ofsie, A.K. Hennig, E.P. Messana and D.A. Cotanche (USA)
Sound damage and gentamicin treatment produce different patterns of damage to the efferent innervation of the chick cochlea 207

P. Mire and G.M. Watson (USA)
Mechanotransduction of hair bundles arising from multicellular complexes in anemones 224

R.R. Fay and P.L. Edds-Walton (USA)
Diversity in frequency response properties of saccular afferents of the toadfish, *Opsanus tau* 235

R. Schoonhoven, V.F. Prijs and J.H.M. Frijns (The Netherlands)
Transmitter release in inner hair cell synapses: a model analysis of spontaneous and driven rate properties of cochlear nerve fibres 247

Calendar of Events 261

Author Index Volume 113 263

Subject Index Volume 113 265

The table of contents of *Hearing Research* is included in ESTOC – Elsevier Science Tables of Contents service – which can be accessed on the World Wide Web at the following URL addresses:
http://www.elsevier.nl/locate/estoc or http://www.elsevier.com/locate/estoc

SUBMISSION PROCEDURE Please submit your manuscript plus three copies of all items including figures (a total of **four** original sets of micrographs should be submitted) and tables to:

Professor Aage Møller
(Editor in Chief)
at the Editorial Office of Hearing Research
P.O. Box 99187
Pittsburgh
PA 15233-4187
USA

Address for courier services:
Cleat Szczepaniak
Editorial Office of Hearing Research
985 Ringgold Street
Pittsburgh
PA 15220
USA

Cleat Szczepaniak
(Editorial secretary)
Tel./Fax +1 (412) 920-1911
E-mail cleats+@pitt.edu

For a full and complete Instructions to Authors, please refer to Hearing Research, Vol. 112, Nos. 1-2, pp. 264–266. The instructions can also be found on the World Wide Web: access under http://www.elsevier.nl or http://www.elsevier.com
